Brief Description of Arguments to be Presented:

The present invention solves a technical problem for screw rotor devices that had previously been thought to be impossible to solve. In particular, many prior art inventions teach ways to reduce gaps and leaks in screw rotor devices. Most prior art screw rotors suffer from the same problem, a blow hole gap, the only exception being a single-pitch screw rotor, also invented by the present inventor. The present invention eliminates the blow hole gap for single-pitch and multiple pitch screw rotors.

An interview was conducted on the above-identified application on _____.

NOTE:

This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP§ 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.
